History: *Doble R* is created in 2000 by initiative of *Raúl Del Río F.* and *Raúl Del Río R.*, with the aim of producing top-quality cherries and commercializing them among the most demanding international markets. That year marks the beginning of the first phase of high-density plantations of Lapins and Bing cherries with technified irrigation. The work continues in 2007 and 2010 with new varieties in order to increase our cherry offer at different times during the season.

Nowadays, *Doble R* is a developed company independently exporting 25,000 boxes per year to North America, Asia and Europe and it is recognized for fulfilling its commitments with clients, suppliers and everyone it has established relations with.
